Expanding Possibilities

| HP | 660LX | Color Palmtop PC |

Another breakthrough from the undisputed leader in handheld PCs.

Introducing
HP 660LX Color Palmtop PC.

HP Color Palmtop PC
Takes You Places!

For 25 years, Hewlett-Packard has been recognized as the leader in the handheld computer (H/PC) market. The first H/PC company to offer a wide, full-sized screen. The first to offer brilliant, backlit, 256 color. And now, with the new HP 660LX color palmtop PC, HP is right where they've always been—in the lead.

The leader with . . . a 56.6 Kbps external modem
Fax, e-mail, or surf the Web with the fastest modem technology available. HP has included a 56.6 Kbps fax/modem card with the HP 660LX for truly superior communications capabilities.

The leader with . . . 32MB RAM
The HP 660LX includes 32MB RAM—the highest standard on-board RAM configuration in the industry—as well as a full 10MB ROM. Plus, unlike some competitive handheld PCs, most of its software applications are stored in ROM—leaving storage memory free and boosting performance.

HP Exclusives

Automatic Synchronization and Battery Recharging
With the HP 660LX, you never have to worry about keeping your information up to date—or your battery charged. Simply drop the HP 660LX into the included docking cradle or use an Ethernet LAN card to automatically synchronize data and files with your office PC. And unlike some competitive handheld PCs, the HP 660LX actually charges its battery while it is synchronizing. When you leave your desk, your data is up to date and your palmtop fully charged!

Plug-and-Play VGA-Out PC Card
Need to give a presentation on the road? This optional card allows you to display your slides at 800-by-600 SVGA resolution—the highest resolution output available in a handheld PC—using any standard VGA monitor or projector.

Preloaded Applications
Maximize your productivity with exclusive, preinstalled software, including pocket versions of Microsoft® Word, Excel, PowerPoint, Internet Explorer, and Outlook personal information manager; Quicken Expens*Able* business expenses manager; and HP's one-of-a-kind Month-at-a-Glance application, which allows you to view your appointment calendar for any one-month or six-month period.

TrueSync CE Technology and REX
Only HP offers TrueSync CE, the exclusive Windows® CE-based synchronization software. Using TrueSync, you can load up to 3,000 contact and calendar records from your HP 660LX to the optional REX—a convenient, business card-sized reference organizer that weighs less than 1.4 ounces and fits easily into your shirt pocket. TrueSync CE and REX offer a truly "hands-free" way to handle your personal information.

Plus . . .

Instant Audio Recording
With HP's audio-compression software, you can record voice memos and even extended conversations, then send them as e-mail attachments for playback on any Windows PC.

Full-Color, Backlit Screen
Like its palmtop predecessors, the HP 660LX's screen is a standout. It offers extra-wide, 640-by-240-pixel, full 256-color viewing for unmatched readability.
